Emblem Meridian Meridian, ID

Investment Opportunity

Opportunity Overview

Investment Opportunity

Emblem Meridian is a 256-unit garden-style/townhome rental community located in Meridian, Idaho within the high-growth Boise MSA. Developed under Quarterra's Emblem program, the project targets middle-income renters and is positioned near key employment corridors along I-84. The overall strength of this deal can be characterized based on the following factors:

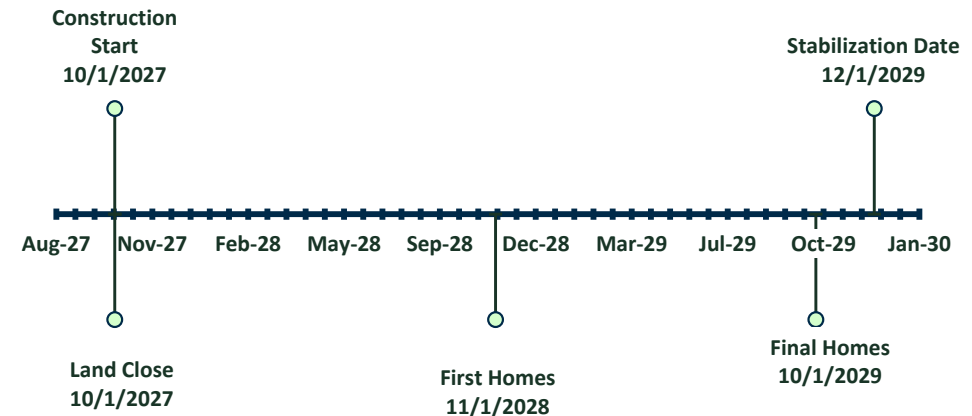

- **Population & Employment Growth:** Idaho ranked second in U.S. population growth (%) per the latest Census data, driven primarily by in-migration to the Boise MSA. Buoyed by Micron's \$15B+ HQ expansion and two chip fabrication plants currently under construction, employment has grown 7% over the past 3-years, outpacing overall population growth of 5.9% in the same period
- **Favorable Market Dynamics:** Current pipeline is down nearly 50% from 2023 and the market is achieving occupancy of 94% among institutional grade comps. Declining concessions (0-4 weeks) have resulted in five consecutive quarters of effective rent growth from 1Q25 to present
- **Strong Demographics:** Median incomes are \$113k within a 3-mile radius of the site with a population exceeding 75,000
- **Pricing Power:** Using Lennar as GC gives Quarterra an especially powerful cost advantage over competing developers in Boise. With local GC capacity increasingly absorbed by Micron and major infrastructure projects, outside groups entering the market will face meaningfully higher construction costs

Financial Summary Metrics

Community	Emblem Meridian (Meridian, ID)
Total cost (\$m) / cost per home (\$k)	\$78.0m / \$305k
Homes / type	256 / Garden + BTR
Untrended development yield on cost	6.65%
Stabilized development yield on cost	7.23%
Project IRR	30.59%
Equity multiple	1.71x
Valuation cap rate at exit (residential)	5.50%
In-place rents	\$2,069
Rent to income ratio ⁽¹⁾	22%
Monthly cost of ownership (rent discount vs. own)	\$4,018 (-49%)
Average Sales Comp Cap Rate	4.60%

1) Rent-to-income ratio is based on 100% AMI within a three-mile radius

Project Timeline

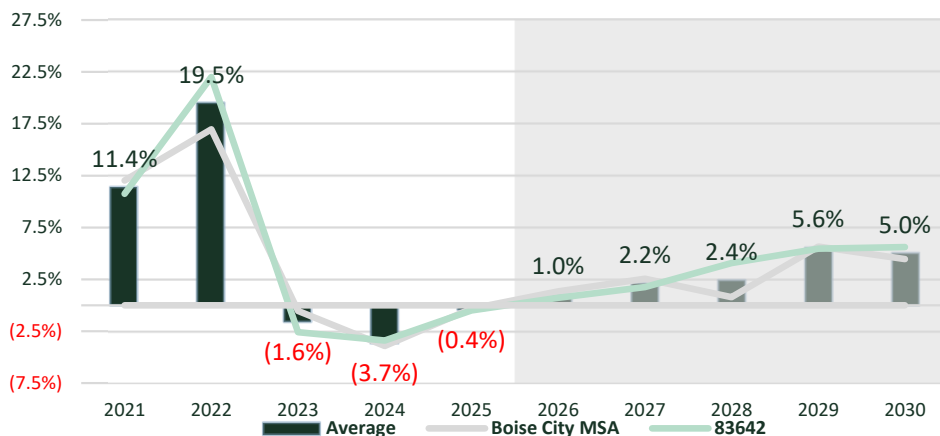

Investment Thesis

Market Fundamentals

- Idaho ranked second nationally for population growth in 2025 at 1.4% with growth highly concentrated in the Boise MSA
- In 2025 the state ranked #8 in the U-Haul Growth index (measuring absolute net population flow) despite being the 38th largest state by population
- While infill locations such as Emblem Meridian's are relatively rare, commoditized sites on the west side of the Treasure Valley tend to be numerous with a "next intersection out" dynamic that led to over-building at the end of the last cycle
- The resulting supply glut (largely delivered from 2022 to 2024) is now fully absorbed with rent comparables experiencing a trifecta of increased asking rents, almost no concessions, and increased occupancies as shown on the right
- With very little forward supply (down approximately 50% from 2023) and an expectation of continued population growth, these positive fundamentals are projected to continue through 2029

Boise, ID Rent Growth

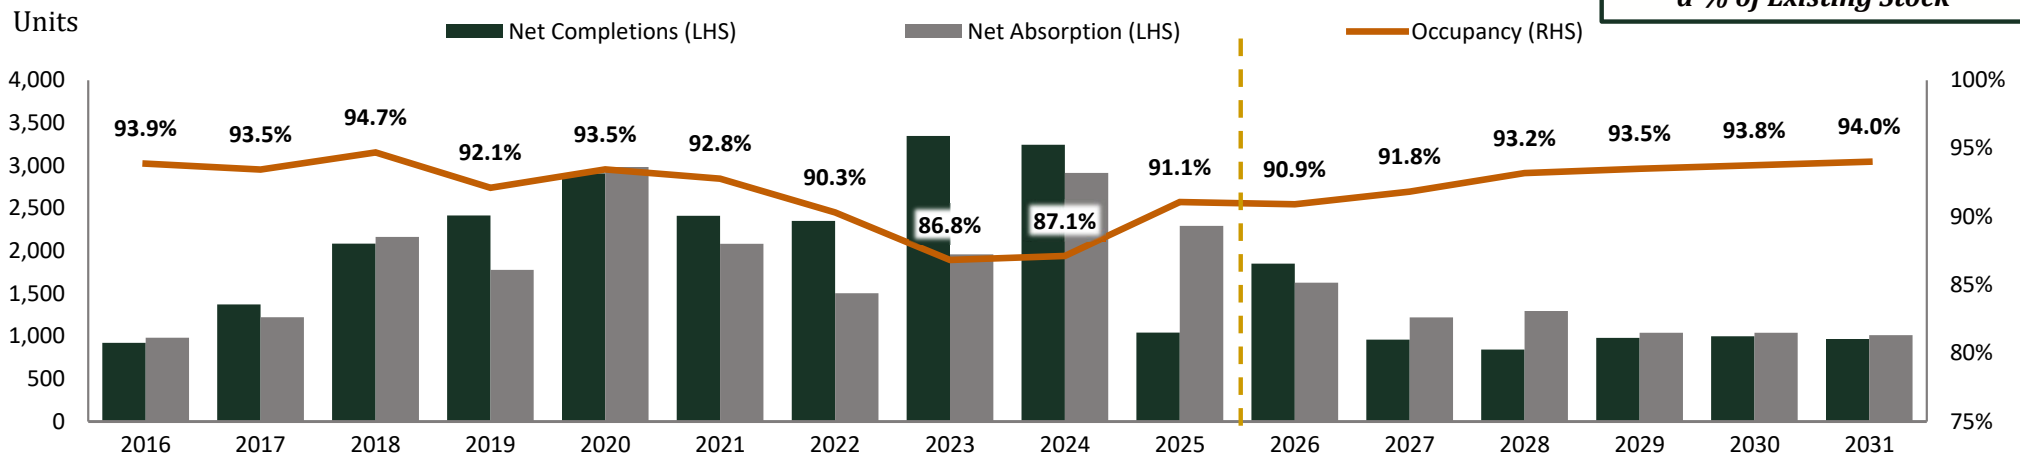

Effective Rent Growth

Boise, ID Market Fundamentals (Total Current Stock: 36,478)

Net Completions and Net Absorption

5.1% Under Construction as a % of Existing Stock

Source: CoStar data as of November 15, 2025 (Multifamily Class A & B)

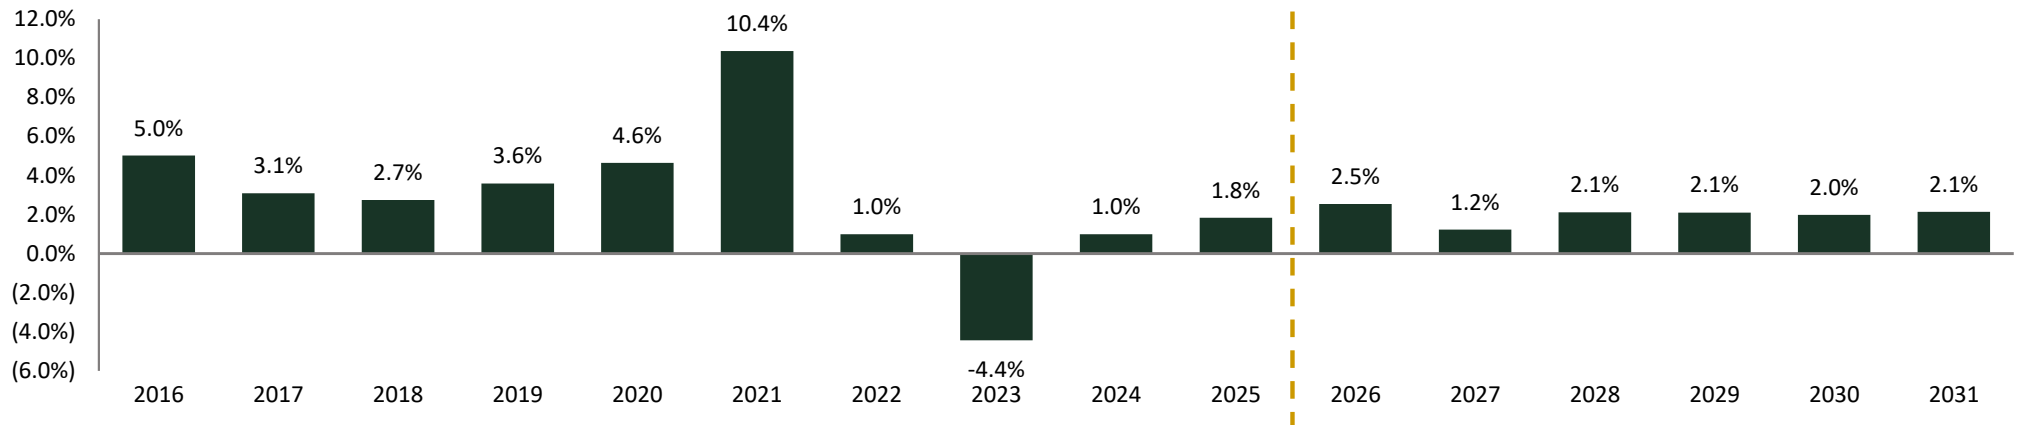

Boise saw peak supply in 2023 and 2024 with over 3,000 units delivered annually. With limited supply in the pipeline, especially of institutional scale projects, Boise is expected to catch up with strong rental demand anticipated in 2028 and 2029 when Emblem Meridian is expected to deliver.

Sub-Market Fundamentals

Meridian, ID Rent Growth

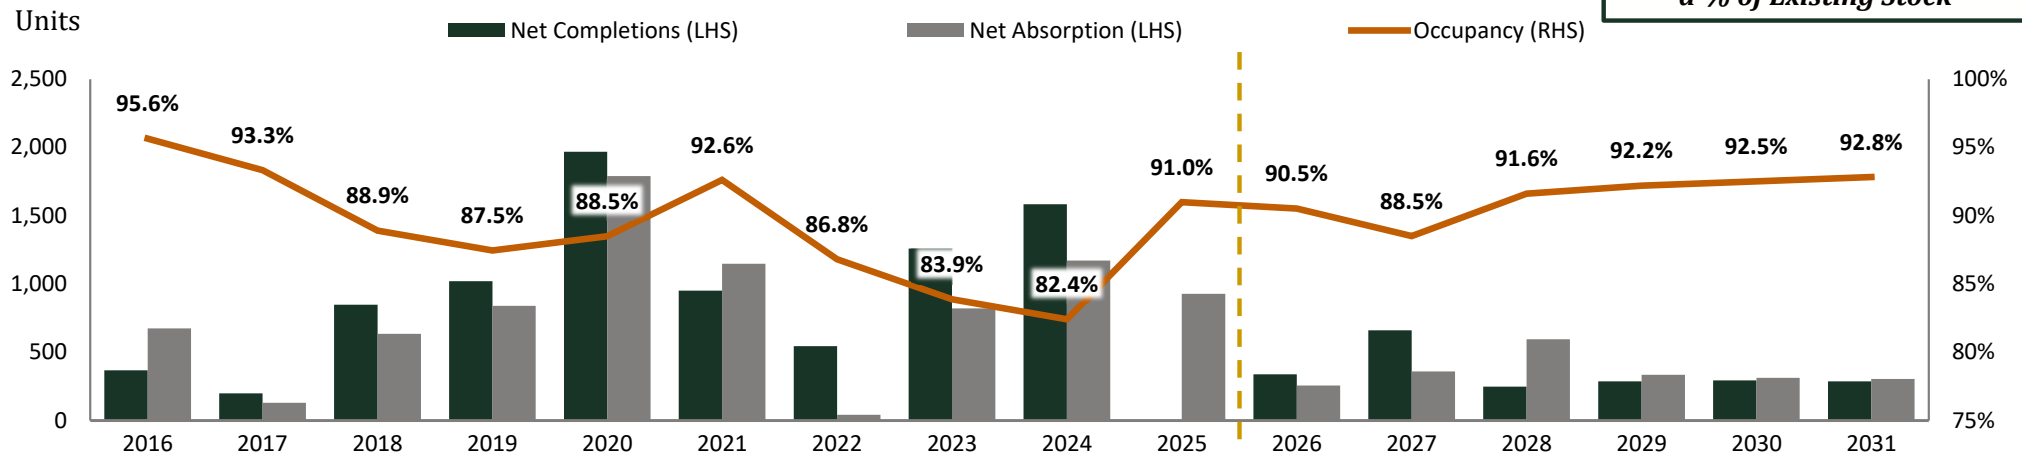

Effective Rent Growth

Meridian, ID Submarket Fundamentals (Total Current Stock: 10,823 Units)

Net Completions and Net Absorption

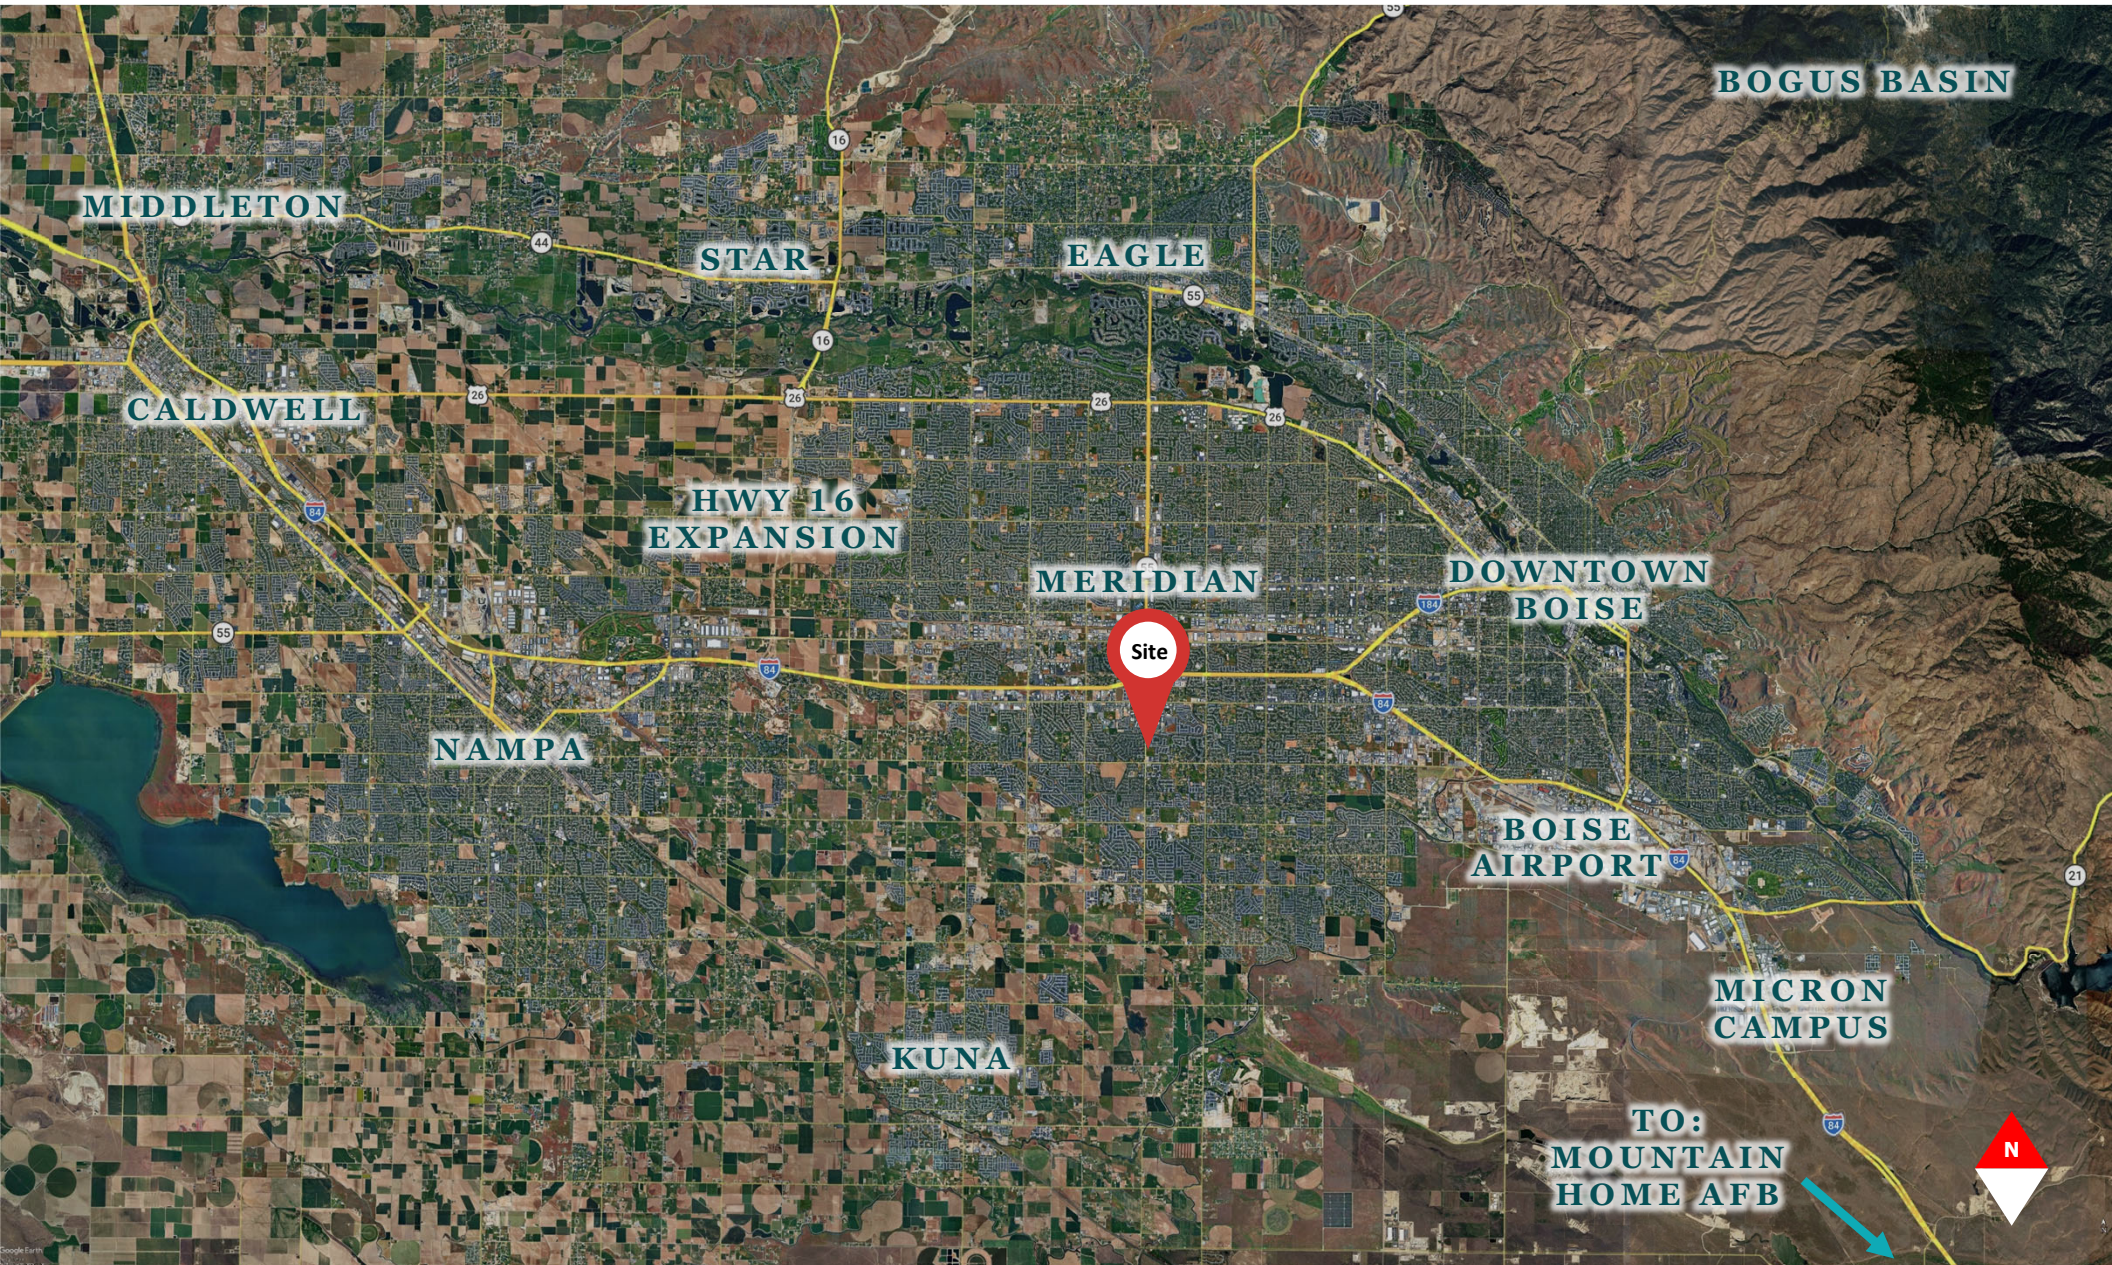

8.2% Under Construction as a % of Existing Stock

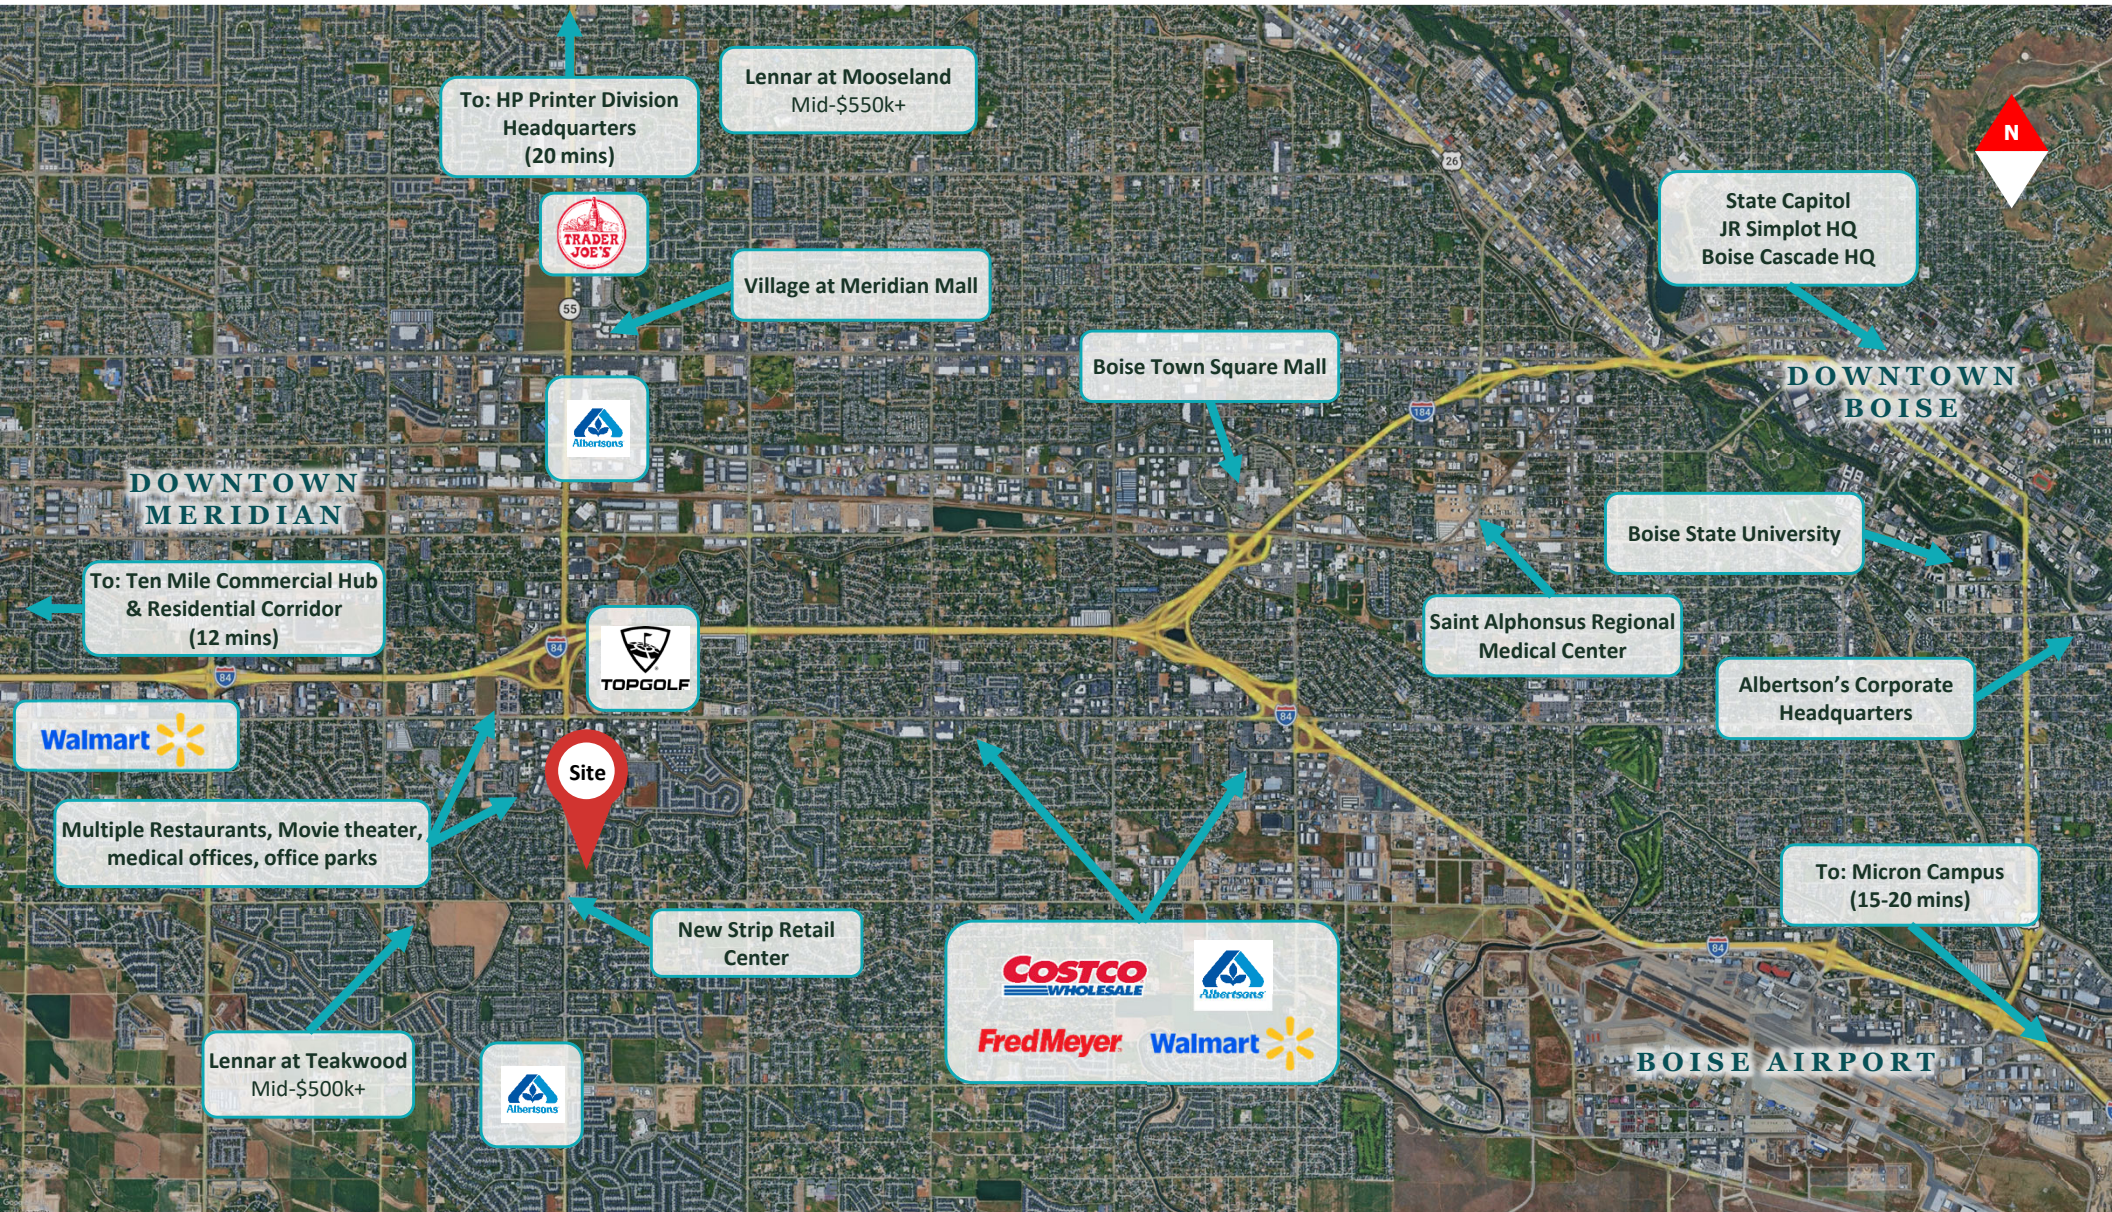

Source: CoStar data as of November 15, 2025 (Multifamily Class A & B)

Following a heavy supply cycle from 2018-2024, net completions have dropped sharply—with zero deliveries in 2025—allowing absorption to outpace new supply and driving occupancy from a trough of ~82% back above 90%. Market fundamentals are expected to continue to grow positively.
